## Instructions for configuring the proxy service in Chrome browser

To configure the proxy service in Chrome browser you need to perform the following steps:

1. After clicking on the Menu icon at the top right, select the "Settings" item as shown in figure 1.

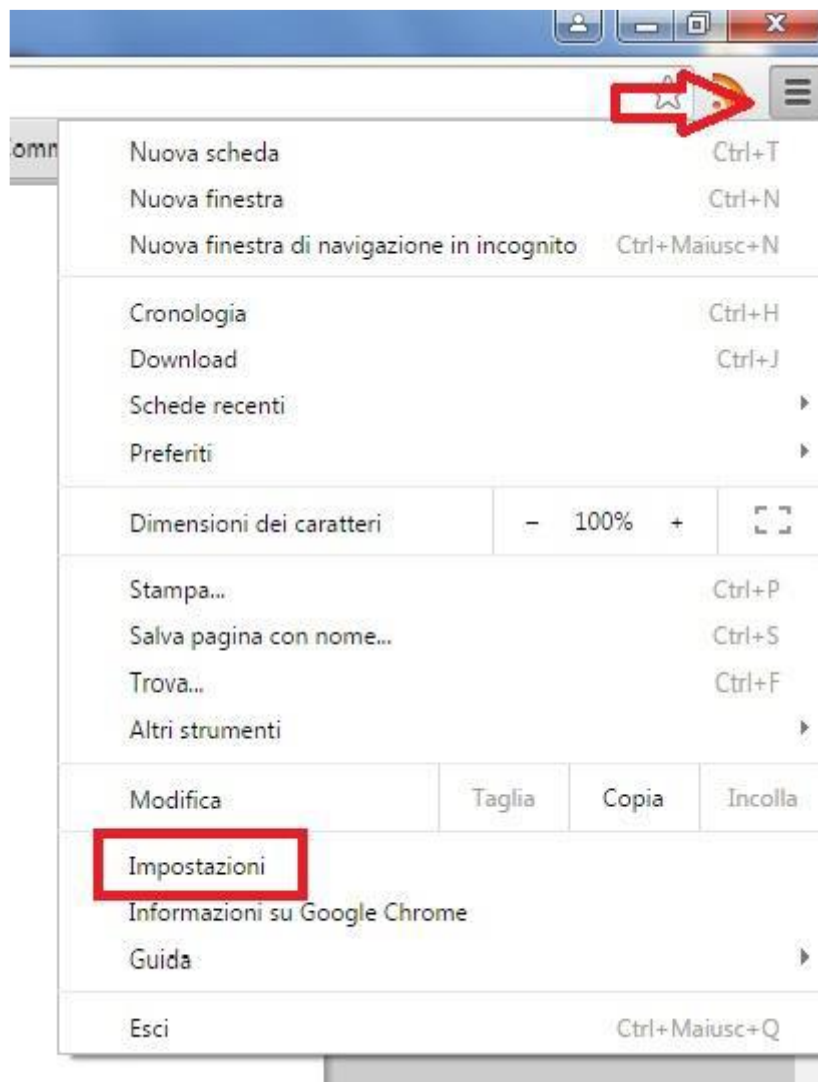

Figure 1 – Settings.

Once the new tab is open, scroll down the page and click on "Show settings advanced ", as shown in figure 2

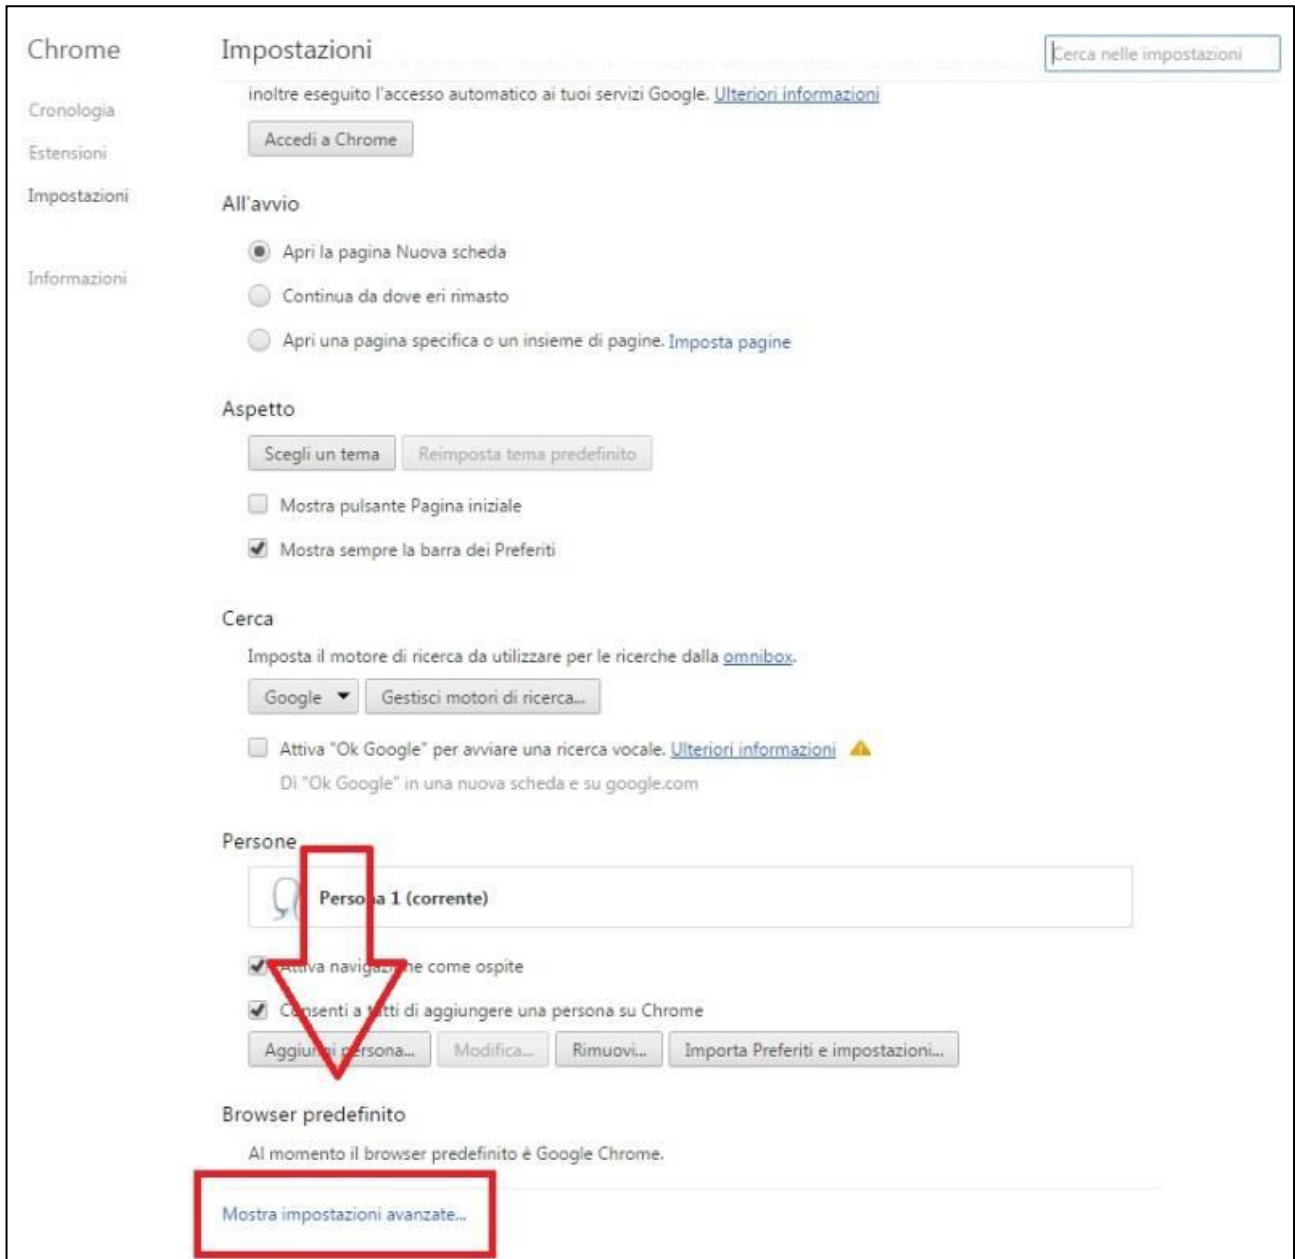

Figure 2 - Settings - Show advanced settings.

Go to the "Network" item and click on the "Change proxy settings" button, as in figure 3

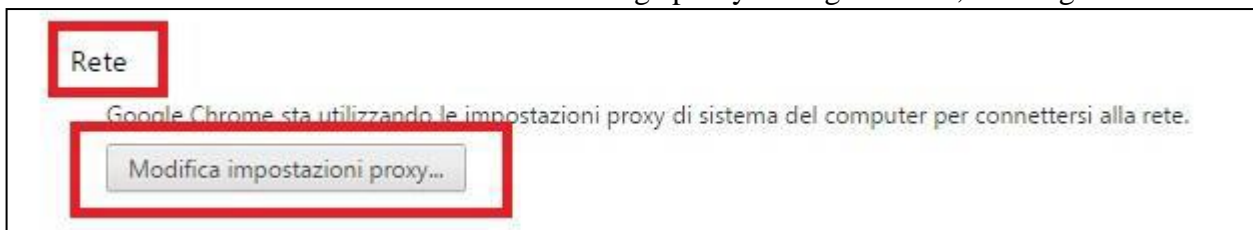

Figure 3 - Change proxy settings

After selecting the “Connections” tab, click on the “LAN settings” button, like shown in figure 4

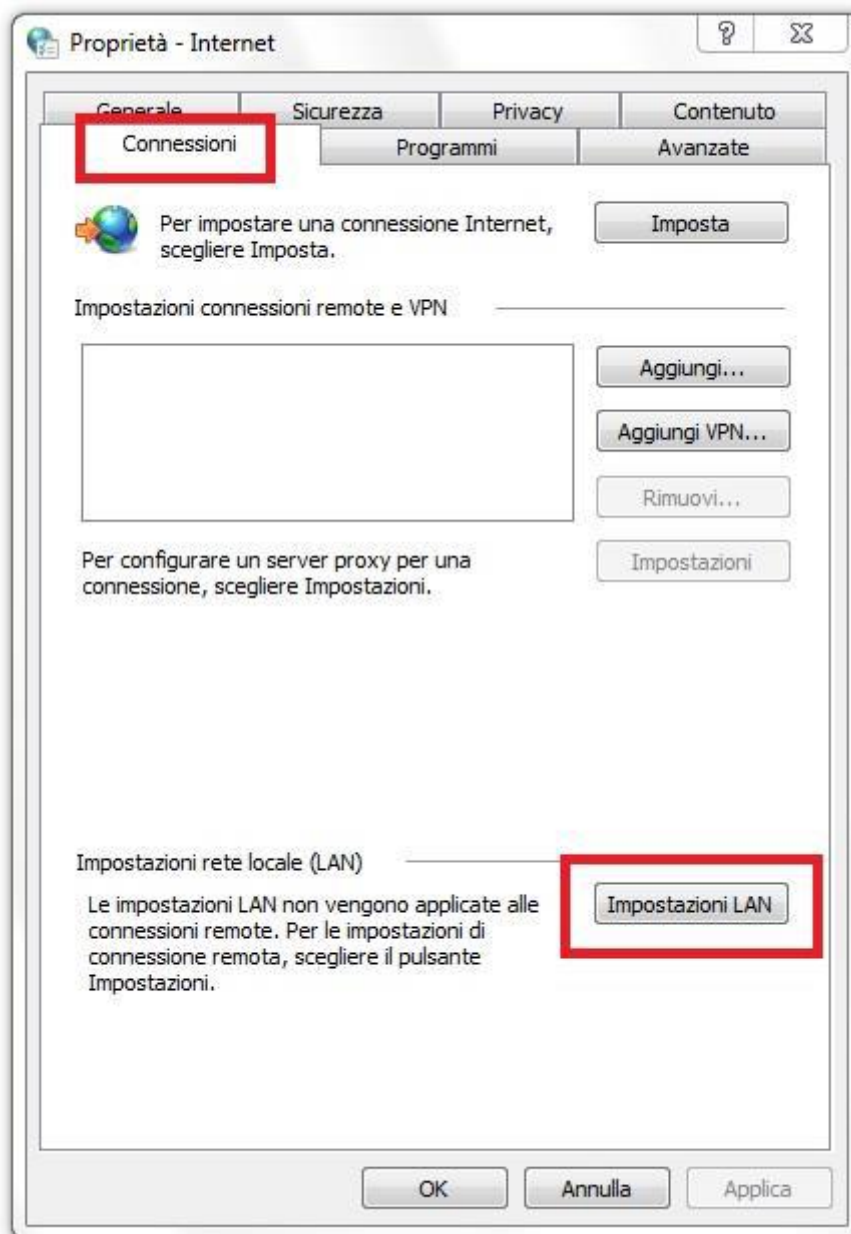

Figure 4 - Connections tab - LAN settings.

In the "Local network settings" tab of the "Proxy server" section, check the "Use a proxy server for LAN connections", then enter the text proxy.unito.it in the "Address" box and in the "Porta" box the value 3128 as shown in figure 5. After configuration click on the "OK" button.

Figure 5 - Use a proxy server for LAN connections

Now you can start browsing. Enter UniTO access credentials when requested. The same section also publishes instructions for the other main browsers in use.
