Instructions for the proxy configuration in Internet Explorer

To configure the proxy service in Internet Explorer browser you need to perform the following steps:

1. After clicking on the "Strumenti (Tools)" icon (in the shape of a gear) at the top right, select the item "Opzioni internet (Internet Options)" as shown in figure 1.

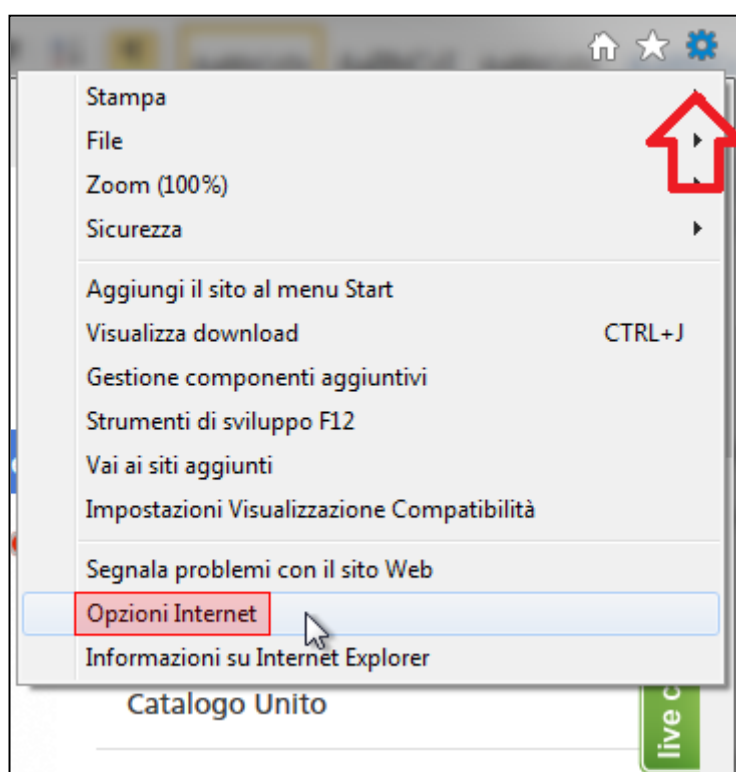

Figure 1 - Internet options.

2. After selecting the “Connessioni (Connections)” tab, click on the “LAN settings” button, like shown in figure 2.

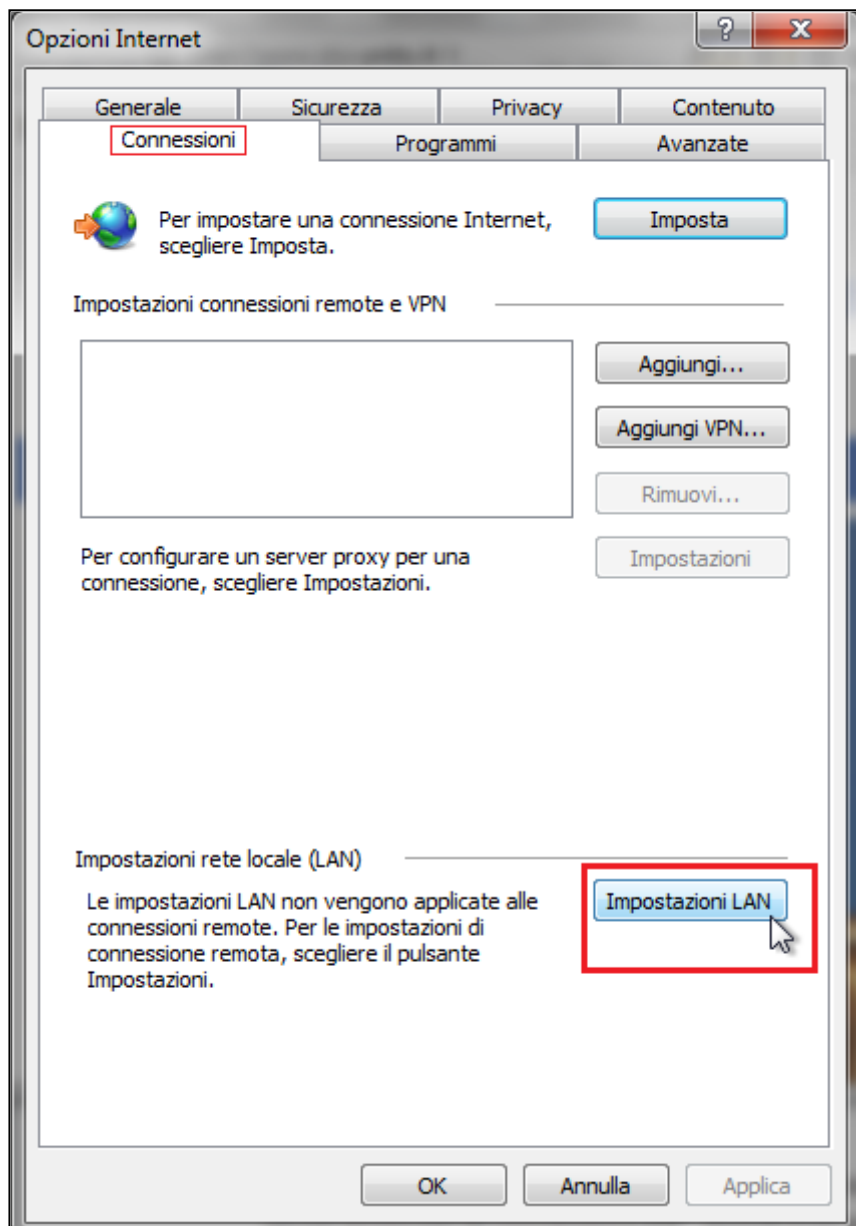

Figure 2 - Internet Options - Connections tab.

3. In the "Proxy server" section of "Impostazioni di rete locale (LAN)" tab, check the "Utilizza un server proxy per le connessioni LAN (Use a proxy server for LAN connections)", then enter the text **proxy.unito.it** in the "Indirizzo (address)" box, and in the "Porta" box the value **3128** as shown in figure 3. After configuration, click on the "OK" button.

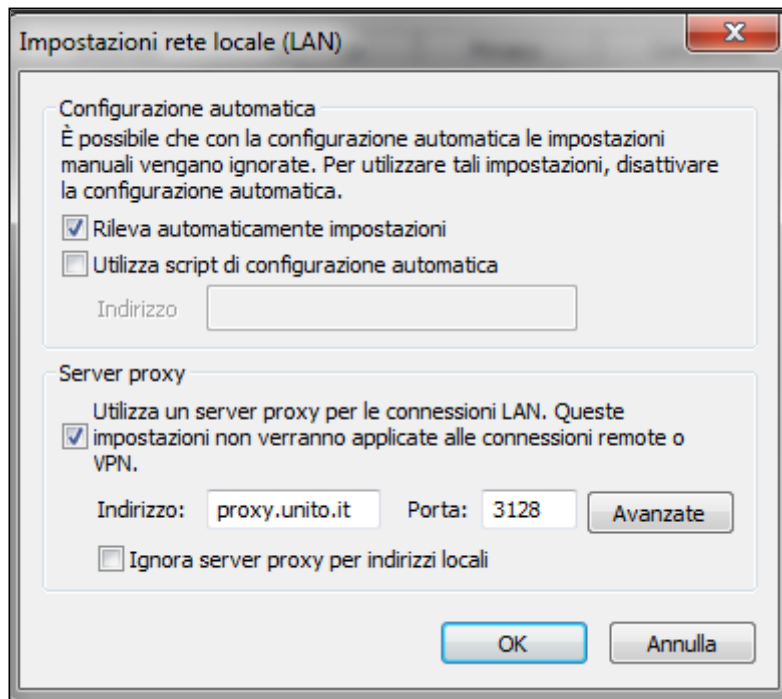

Figure 3 - Local area network (LAN) settings

Now you can start browsing. Enter the UniTO credentials when requested. The same section also publishes instructions for the other main browsers in use.
