Instructions for the proxy service configuration in Firefox

To configure the proxy service in Firefox browser you need to perform the following steps:

1. After clicking on the Menu icon at the top right, select the "Options" item as indicated in Figure 1.

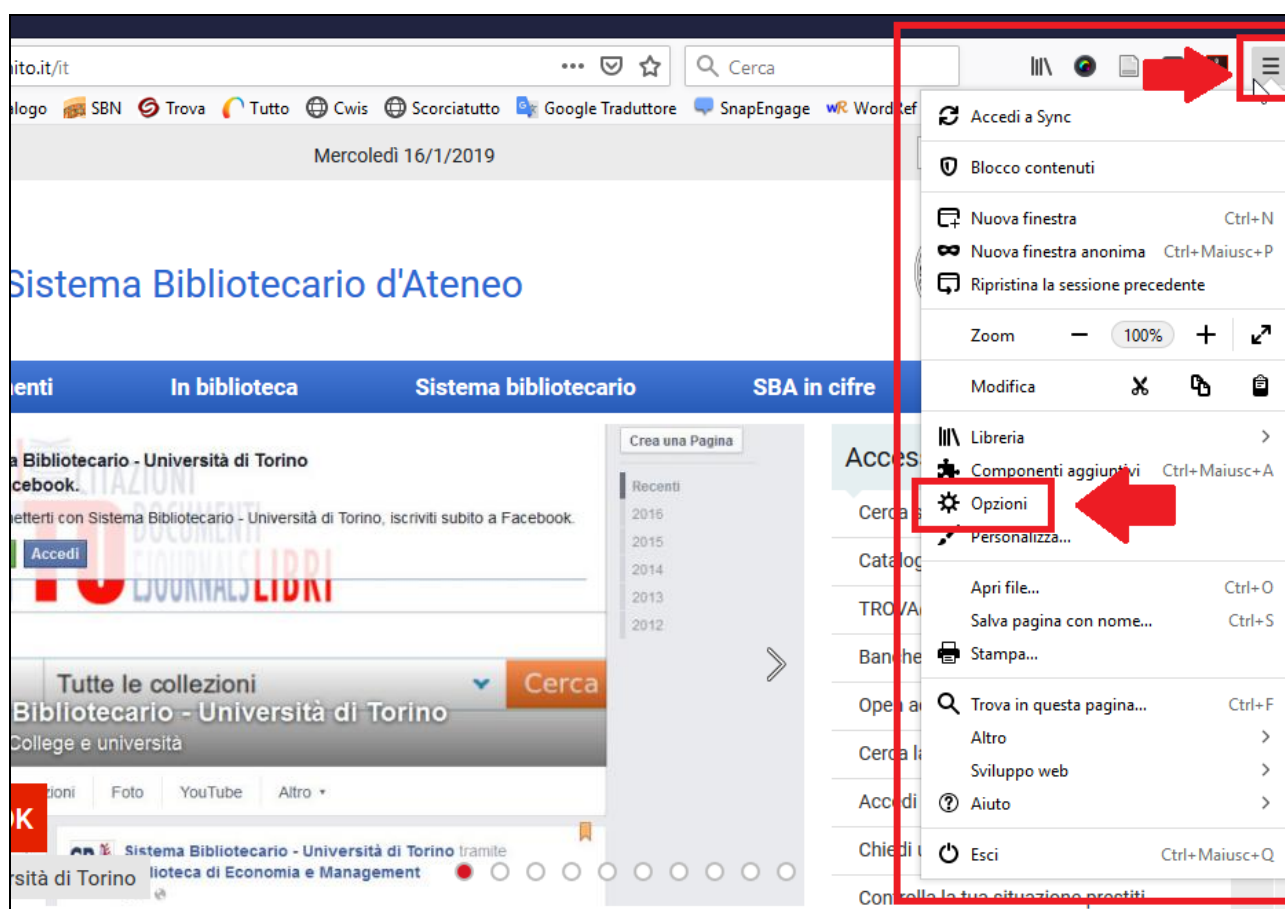

Figure 1 – Options

2. In the "Impostazioni di rete (Network)" tab click on the "Impostazioni (Settings)" button

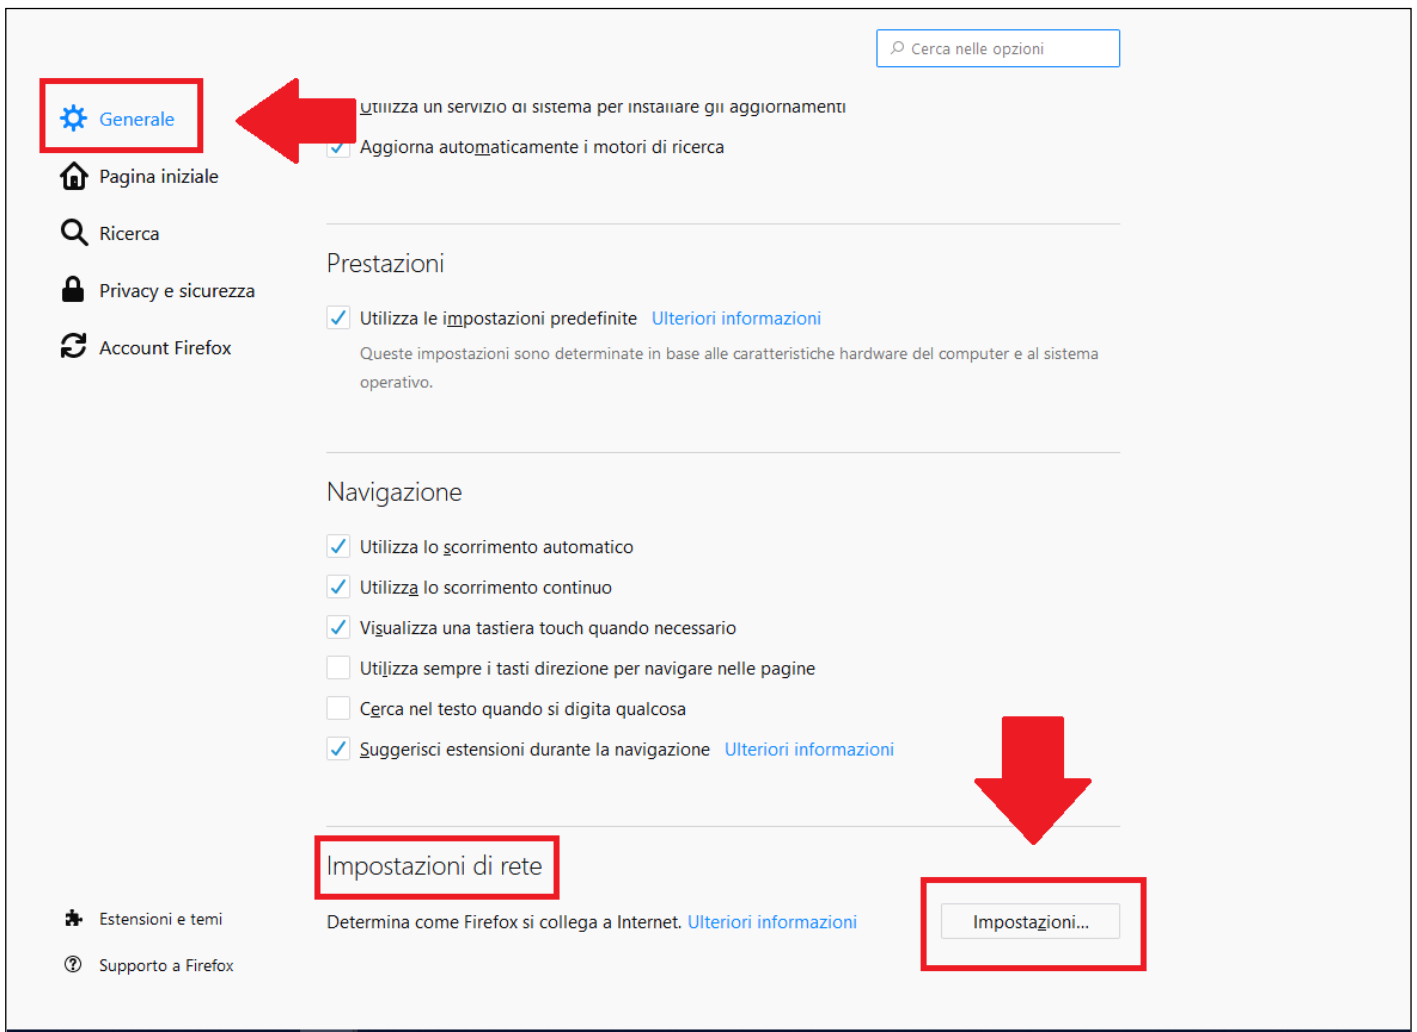

Figure 2 - General – Settings

- Now click "Configurazione manuale dei proxy (Manual proxy configuration)", then enter the text in the "proxy HTTP" box **proxy.unito.it** and in the "Porta" box the value **3128** as shown in figure 4. Don't forget to check "Utilizza lo stesso proxy per tutti i protocolli (Use the same proxy for all protocols)". Once the configuration is complete, click on the "OK" button.

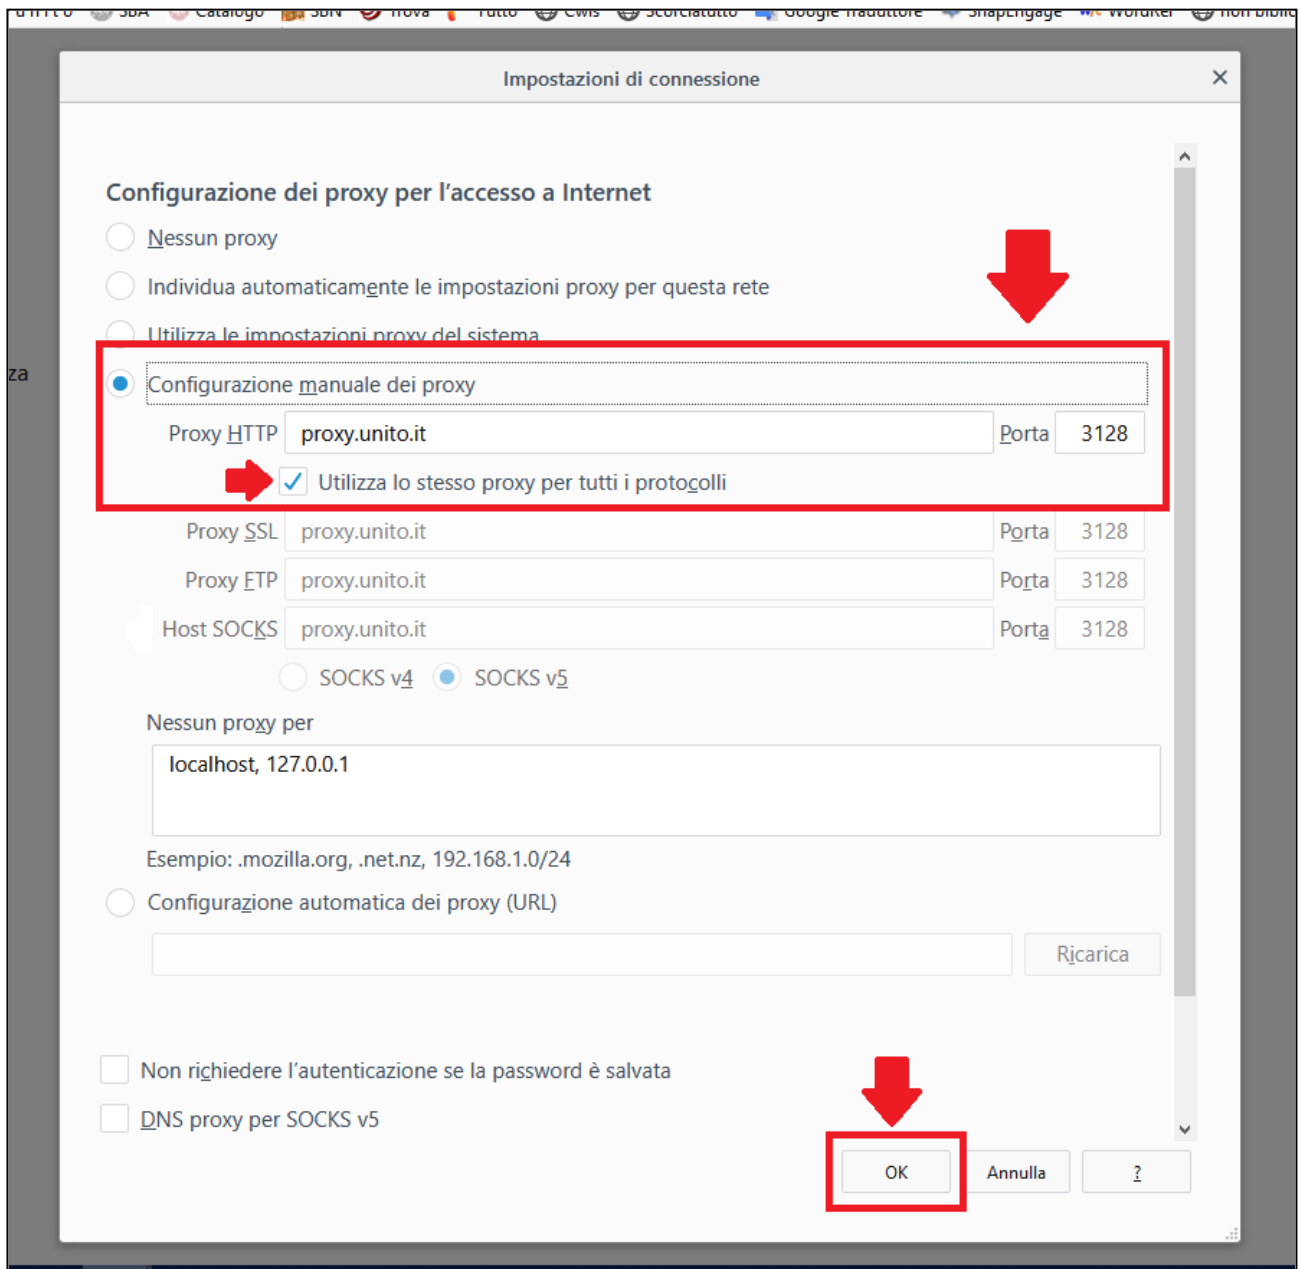

Figure 3 - manual configuration of proxy server

Now you can start browsing. Enter UniTO credentials when requested. The same section also publishes instructions for the other main browsers in use.
